4. (Withdrawn) A process for preparing the compound of claim 1, comprising

wherein R^e is a hydrogen or an ester protecting group, with a compound of formula V,

in which A, B, D, E and ring^1 , ring^2 , ring^3 and ring^4 are defined as in the compound of formula I, and wherein R^z is chlorine atom, imidazolyl or OH,

in the presence of a base, or after silylation with a suitable silylating agent, to give a compound of formula VI,

wherein A, B, D, E, R^e and ring¹, ring², ring³ and ring⁴ are as defined above, and

- b) where R^e is the ester protecting group, reacting a compound of formula VI, which has been prepared in accordance with step a), with a solution of an alkali such as NaOH or LiOH, and then treating with acid, to give the carboxylic acid of formula VII, with modifications in one of the side chains of ring¹-ring⁴ also having previously been carried out, where appropriate,

and then converting this compound into the compound of formula I wherein X is NH-OH, and

- c) optionally separating the compound of formula I, which has been prepared in accordance with steps a) or b) into an individual enantiomer by means of salt formation with an enantiomerically pure acid or base, chromatography on a chiral stationary phase or derivatization using chiral, enantiomerically pure compound, such as an amino acid, separation of the resulting derivatized diastereomers and elimination of the chiral auxiliary derivatization group, or

- d) optionally isolating the compound of formula I, which has been prepared in accordance with steps b) or c), in free form or, when an acidic or basic group is present, converting it into a corresponding physiologically tolerated salt.
5. (Previously presented) A pharmaceutical preparation comprising a pharmaceutically effective amount of at least one compound according to claim 1 and a pharmaceutically tolerated carrier.
6. (Withdrawn) The use of the compound of claim 1 for the prophylaxis or therapy of a disease such as osteoarthroses, spondyloses, cartilage loss following joint trauma or a relatively long period of joint immobilization following meniscus or patella injuries or ligament rupture.
7. (Withdrawn) The use of the compound of claim 1 for the prophylaxis or therapy of a disease s of the connective tissue such as collagenoses, periodontal disease or wound healing disturbances.
8. (Withdrawn) The use of the compound of claim 1 for the prophylaxis or therapy of a chronic disease of the locomotory apparatus, such as inflammatory, immunologically-determined or metabolism-determined acute and chronic arthritide, arthropathy, myalgia and a disturbance in bone metabolism.
9. (Withdrawn) The use of the compound of claim 1 for the treatment of ulceration, atherosclerosis or stenoses.
10. (Withdrawn) The use of the compound of claim 1 for the treatment of inflammations, cancer disease, tumor metastasis formation, cachexia, anorexia, heart failure or septic shock.
11. (Withdrawn) The use of the compound of claim 1 for the prophylaxis of myocardial and cerebral infarcts.
